A1EAC SERIES

1" CHARGED MEDIA ELECTRONIC AIR CLEANER

The Amana® brand A1EAC Charged-Media Electronic Air Cleaner provides a 24-volt, polarized charge on the media pads to capture and remove airborne particles as small as 0.01 micron. The carbon-graphite center charging screen is permanently mounted to the air cleaner frame. Attached to each of the frame's four corners, internal center screen spacers are open-faced to maximize airflow. For added durability, a one-piece, injection-molded power head is "capped" and sealed to be watertight.

Standard Features

- Does not produce hazardous ozone or positive ions
- Fits into any one-inch filter opening
- Quiet operation
- Fully electronic, reliable, high-efficiency carbon-graphite center screen removes small airborne particles
- Efficiency increases as the air cleaner operates
- Designed to operate with constant power or with the system's fan to permit reliable, long-term performance
- Easily removable, high-density, multi-layered replacement media pads
- Fits all central HVAC residential systems
- Independently tested and certified
- MERV 10 Rated Efficiency (ASHRAE Standard 52.2)

Cabinet Features

- Carbon graphite center charging screen permanently mounted to air cleaner frame
- Corner insulators keep screen in place and help prevent arcing, snapping, and loss of power
- Notched, recessed, and insulated center charging pin improves performance and quieter operation
- Stainless steel latches provide durability
- Corrosion-resistant construction is built for a thin, easy fit and trouble-free installation
- Open-face design maintains low static pressure
- One-piece, injection-molded power heads "capped" and sealed to be water-tight
